

Northern Arizona University
School of Informatics, Computing, and Cyber Systems
Admissions Committee

I am writing to provide my strong recommendation for Mr. Sherif Shawashen, who is applying for the PhD program in Informatics and Computing. I have had the pleasure of working with Sherif during his undergraduate studies in the Software Engineering Department, particularly as his instructor in the Wireless Networks course.

I first met him when he approached me to discuss and select a set of courses that would best support his plans for a scholarship semester abroad in the United States. During that meeting, he brought a prepared list of potential courses, asked specific questions about how each one would strengthen his background for graduate studies, and took detailed notes on my feedback. This early interaction clearly showed how thoughtfully he plans his academic path and how much he cares about learning and long-term development.

Throughout my interactions with Sherif, he has consistently demonstrated strong technical ability, intellectual curiosity, and a clear motivation to deepen his expertise at the intersection of software development and computer networks. In one of his course assignments, for example, he analyzed the impact of interference on wireless throughput using a small experimental setup and presented his findings in a concise, which was among the stronger submissions in the class. He actively participated in discussions, asked insightful questions, and demonstrated the ability to connect theoretical concepts with real-world challenges.

Beyond his technical capabilities, Sherif is a highly disciplined and committed individual. He approaches his academic responsibilities with consistency, and a strong sense of responsibility. During the semester, he was always punctual, met deadlines reliably, and often submitted work that exceeded the basic requirements when he felt it could be improved further.

I am confident that Sherif will make a meaningful and positive contribution to your graduate program, both academically and through research engagement and I offer my strong recommendation for his admission and firmly believe that he has the potential to achieve significant academic and professional success in the field of Computer Science. Should you require any additional information or clarification regarding his academic qualifications or performance, please do not hesitate to contact me.

Sincerely,
Fatma Abd-Alhaleem
